

Enhancing business connections.

HOSTED OR ON-PREMISE TELEPHONY SOLUTIONS

New technology continues to reinvent small businesses — particularly on the telephony front — and changing the way they communicate.

In fact, PBX systems — either on-premise or hosted — are powering SMBs to go the next-level in voice, unifying workplaces, ramping up customer experiences and enhancing caller experiences. Like their larger counterparts, SMBs need to be at the forefront of innovation and deliver transformational change in the digital age.

Welcome to Fortinet's FortiVoice: a feature-rich communication system that delivers unparalleled flexibility and versatility, and caters to the individual needs of today's tech-driven businesses.

PABX/TELEPHONY

FEATURE SUMMARY

Simplified Management

FortiVoice™ Enterprise Phone Systems bring centralised management to new heights, allowing you to reduce IT overheads and operating expenses. Configure and update your connected systems easily across multiple locations, monitor real-time performance and access reports.

Rich Features

Built-in features include auto-provisioning, line/extension appearance, ring groups, user privileges, call queue, call barge, multi-location integration—and that's just the beginning. Through a series of advanced capabilities, the system is designed to save you the hassles associated with traditional, more restricted phone systems.

Value & Scalability

Setting Fortinet apart from other PBX providers, there's no hidden costs on advanced features or recurring subscription fees, ensuring transparent pricing, simplicity and affordability. Whether positioning the system in a smaller office or a larger one, it accurately scales and caters to your unique business requirements—even as they change.

FortiVoice™ Gateway - Business Continuity

Integration with FortiVoice™ Gateway safely secures your system with local survivability, allowing for 'always on' communications in the event of a natural disaster or emergency.

Fortinet FON-175 a popular choice for businesses.

Purpose-built, Quality Design

Empower your business with FortiVoice. A range of purpose-built quality features enables effective communication and boosts customer support.

- **FortiFone Softclient**

With FortiFone Softclient for PC/MAC and for Mobile, take your calls anywhere you have data access—escaping the limitations of the traditional desk phone.

- **IVR & Auto-attendant**

Ensure you don't lose those important calls. Direct your customers to Sales, Service, Accounts or to wherever you need. Direct and greet your callers differently if they ring during out of hours or on public holidays.

- **Phone Compatibility**

The FortiVoice system offers near-unlimited choice – it supports a wide range of existing handsets, and also provides a host of new devices designed to maximise these feature-rich capabilities.

- **Keep your number**

No need to worry about losing your number when adopting these solutions – we have the ability to port existing numbers from your current provider.

...and more.
